Subject: Confirmation Sampling of Phase 3
Attachments: FIG3 DRFAT.pdf

Joyce,

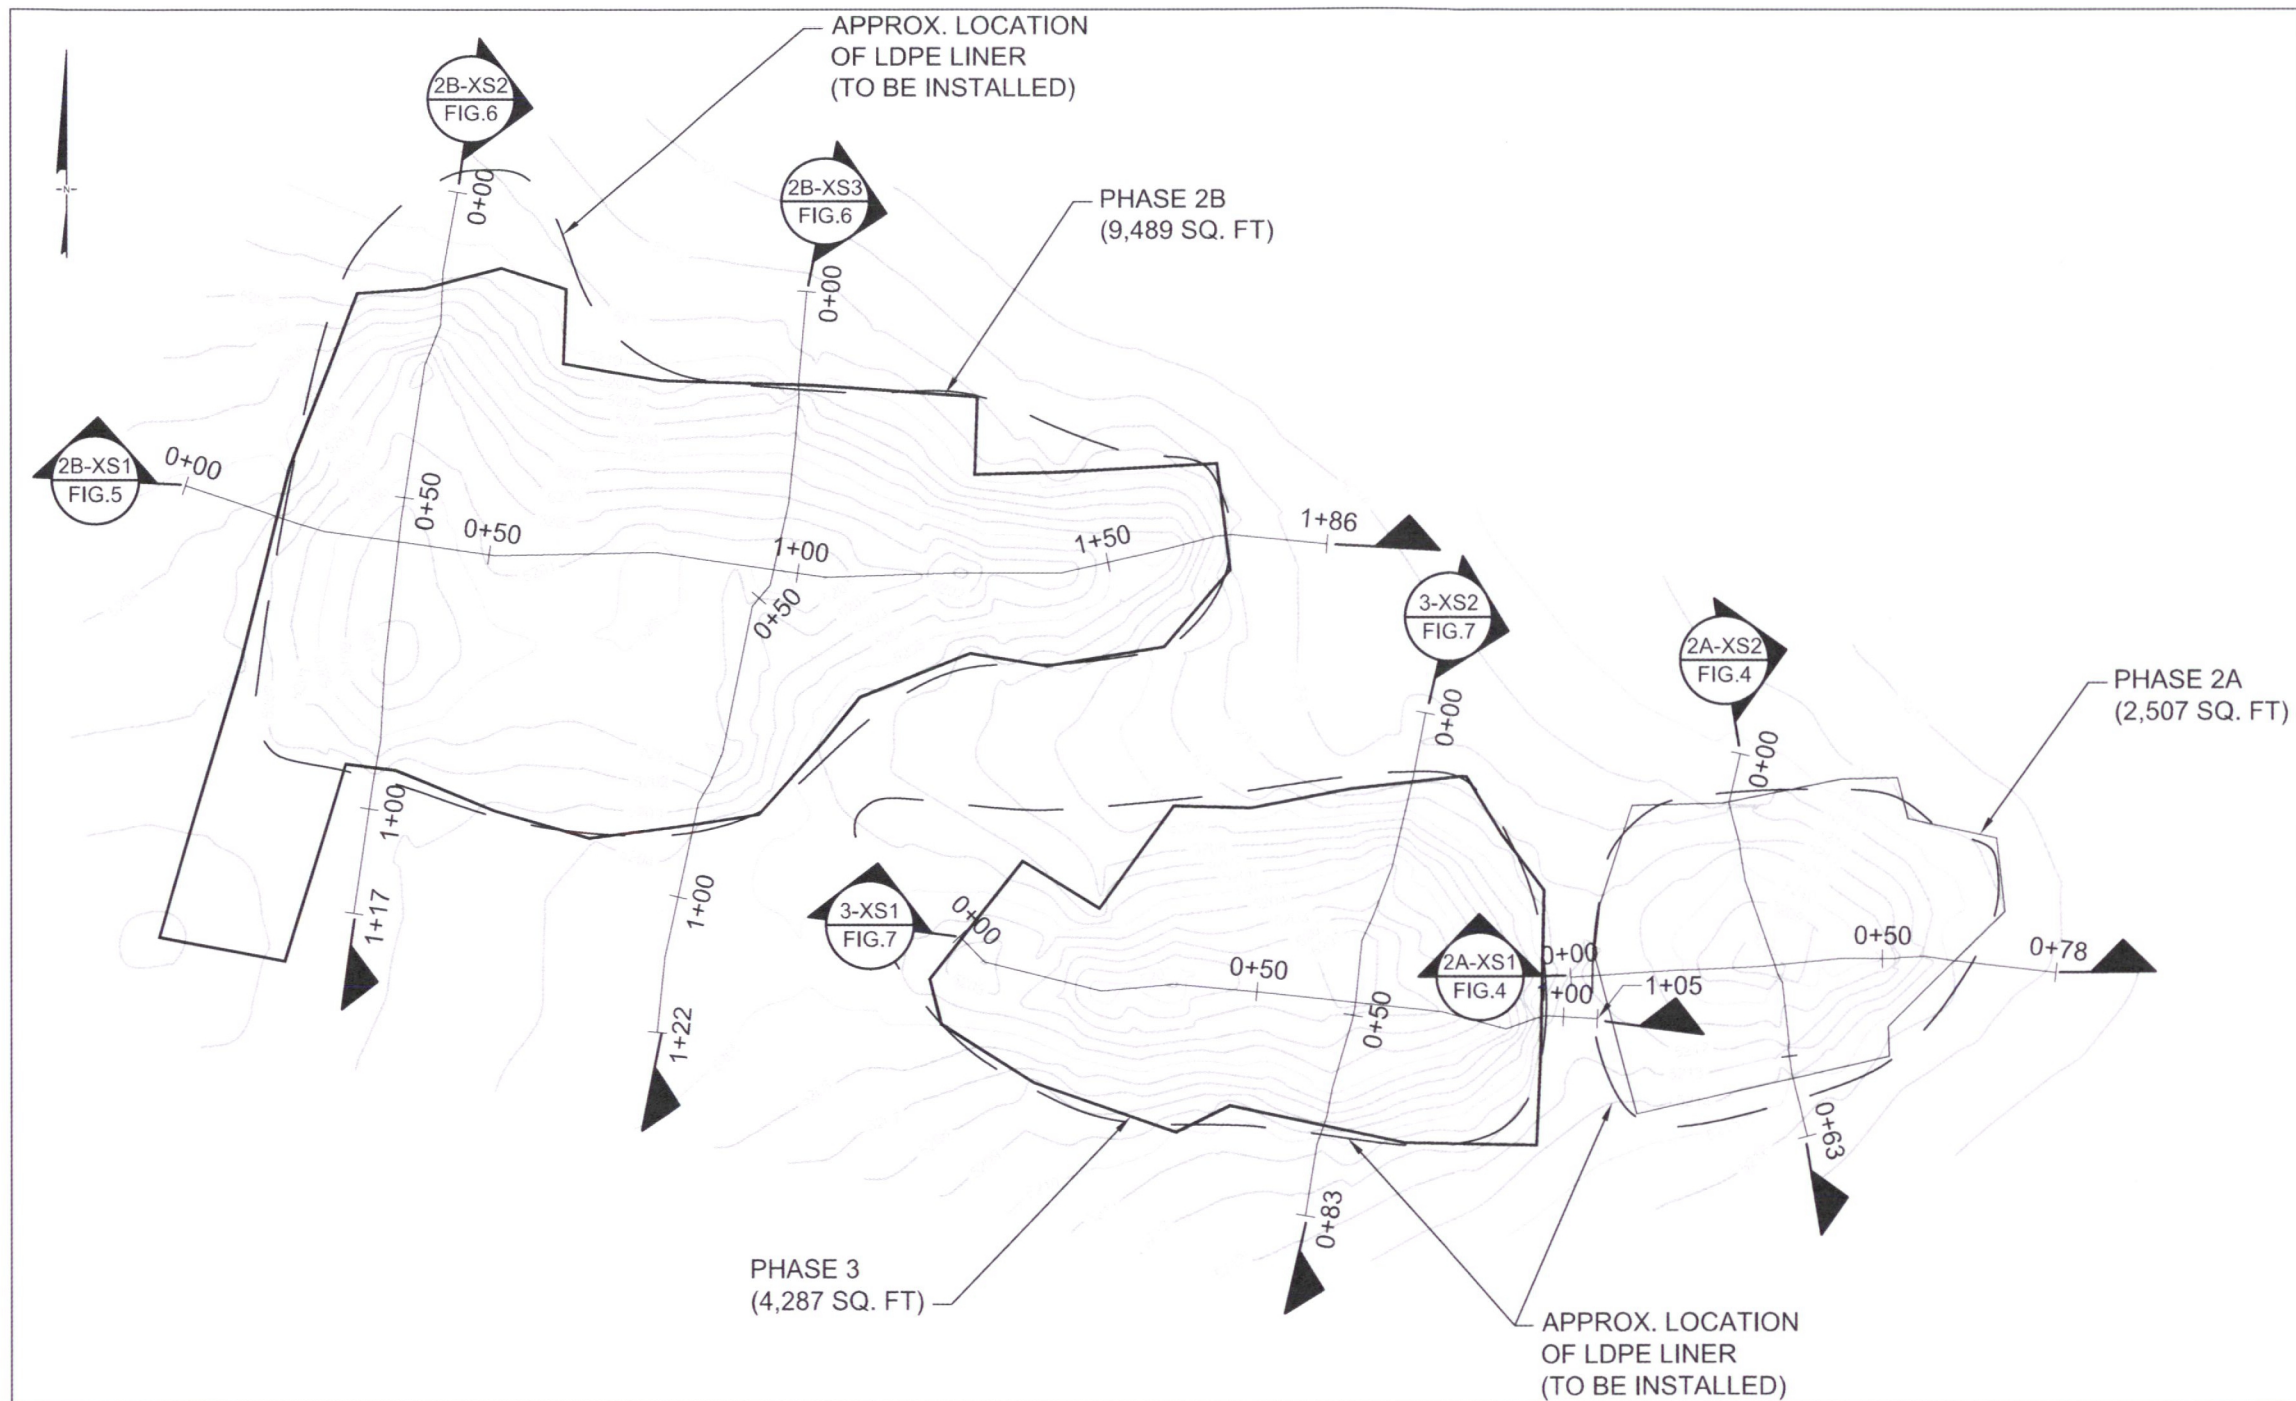

We are hoping to complete confirmation sampling of Phase 3 excavation either tomorrow or Saturday. Our intention is to dig 1 to 2' into the floor where possible as well as the side walls. Based on currently available survey data, draft attached we will need approximately 5 side wall samples and at least 2 floor samples to meet the DRWP criteria. The samples will be submitted for total VOCs, SVOCs and RCRA metals at a minimum. Please let me know if this is acceptable and I will advise you this afternoon if it will be tomorrow. If there is a problem in conducting the work in the next two days please advise me at your earliest convenience. Also if you would like additional sampling or analyses please let me know. If you have any questions I can be reached on my Cell number below.

Thanks TJK
